

# Narrative Analysis Codebook

## A.1 Overview and Coding Conventions

| Item                    | Description                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Purpose</b>          | To evaluate simulated or narrative-based historical conversations along three analytic dimensions: Authenticity of Historical Representation, Engagement, and Educational Value |
| <b>Unit of Analysis</b> | one speaker's turn                                                                                                                                                              |
| <b>Coding Category</b>  | Yes (if present or qualifies) or No (if not present or not qualifies)                                                                                                           |

## A.2 Authenticity of Historical Representation (A)

### Definition:

The degree to which a segment plausibly and responsibly represents historical experience, context, and epistemic limitations, consistent with known historical conditions.

| Code      | Subdimension                            | Definition                                                                               | Key Indicators                                                                                                        | Decision Rule                                                                                                             |
|-----------|-----------------------------------------|------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>A1</b> | Verisimilitude (Sensory & story Detail) | Extent to which the segment conveys lived historical experience through concrete detail  | Sensory language; material details; bodily actions (e.g., labor, hunger, fear)                                        | Do not reward poetic language (or the elegance of language/style) unless it's anchored in plausible historical conditions |
| <b>A2</b> | Contextual Accuracy                     | Degree to which institutions, practices, and social relations are historically plausible | Correct historical terms; plausible settings; realistic social consequences                                           | Do not penalize lack of dates or individual names (because team prompted the system not to specify)                       |
| <b>A3</b> | Relexivity                              | Extent to which limits of knowledge and memory are acknowledged                          | Explicit doubt or uncertainty; recognition of contested narratives; avoidance of totalizing claims/overgeneralization | n/a                                                                                                                       |
| <b>A4</b> | Position awareness                      | Degree to which the speaker situates themselves and reflects                             | Role identification; awareness of power                                                                               | Emphasize not on "right" or "wrong" perspectives, but the awareness of how their position                                 |

| Code | Subdimension | Definition                         | Key Indicators                | Decision Rule                  |
|------|--------------|------------------------------------|-------------------------------|--------------------------------|
|      |              | on how position shapes perspective | relations; reflection on bias | contributes to the perspective |

### A.3 Engagement (E)

**Definition:**

The degree to which a segment invites sustained cognitive, emotional, social, or aesthetic involvement.

| Code      | Subdimension                                                 | Definition                                                                                                     | Key Indicators                                                        |
|-----------|--------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|
| <b>E1</b> | Cognitive Engagement                                         | Provokes thinking, questioning, or interpretive effort (among agents, or audience)                             | Open-ended questions; moral or causal reasoning; comparative framing  |
| <b>E2</b> | Emotional Engagement                                         | Evokes affective response (e.g., empathy, discomfort, sorrow) (among audiences, in some cases among agents)    | Emotional language; narratives of suffering or joy; vulnerability     |
| <b>E3</b> | Dialogic / Social Engagement                                 | Invites response, dialogue, or perspective-taking (from other agents/user if they're part of the conversation) | Direct questions; acknowledgment of others; bridging perspectives     |
| <b>E4</b> | Behavioral / Practical Engagement                            | Encourages action beyond reading/listening                                                                     | Calls to remember, teach, discuss, or act                             |
| <b>E5</b> | Aesthetic / Performative Engagement (e.g., linguistic style) | Sustains attention through narrative form                                                                      | Story arcs; figurative language; pacing and tension; vocabulary, etc. |

### A.4 Educational Value (V)

**Definition:**

The potential of the segment to support learning goals related to historical understanding, critical thinking, and reflection.

| Code      | Subdimension                                                              | Definition                                            | Key Indicators/examples                                                       |
|-----------|---------------------------------------------------------------------------|-------------------------------------------------------|-------------------------------------------------------------------------------|
| <b>V1</b> | Support learning historical knowledge (Do the materials offer knowledge?) | Supports historical knowledge, facts, or major claims | Mention of historical facts, knowledge of specific events, groups, or society |

| <b>Code</b> | <b>Subdimension</b>                                                                                                                          | <b>Definition</b>                                                      | <b>Key Indicators/examples</b>                                    |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-------------------------------------------------------------------|
| <b>V2</b>   | Scaffolding for Interpretation (Do the materials provide enough space and help for interpreting and understanding the relevant information?) | Helps learners understand how to interpret the information             | Contextual cues; explanatory framing; implicit guidance, sources  |
| <b>V3</b>   | Historical Thinking/Interpretation Opportunities (How do the materials inspire thinking/interpretation?)                                     | Supports contextualization, raises different ideas/disagreements, etc. | Multiple interpretive entry points                                |
| <b>V4</b>   | Assessment & material Readiness (How readily usable the materials are as educational content?)                                               | Ease of use for discussion, writing, or evaluation                     | Standalone usability; clarity of evidence to support claims, etc. |
| <b>V5</b>   | Trauma Sensitivity & Ethical Framing (Are the materials presented ethically?)                                                                | Handles violence, fear, and loss responsibly                           | Avoid sensationalism; acknowledgment of harm; respectful tone     |
